

Wi-Fi live stream (FPV) camera support

BuWizz App allows you to connect to a Wi-Fi live stream (FPV – First Person View) camera in order to project the camera's image in the background of the control profile.

In order to use this function, you will need a compatible Wi-fi camera, which is sold in BuWizz online shop.

1. **Turn on the Wi-Fi camera**
2. **Press ARROW DOWN BUTTON** on the right side of the camera **to enable it's Wi-Fi**
3. In your control device's **Wi-Fi settings connect to iCam Wi-Fi Network**
4. Insert camera's **Wi-Fi PASSWORD** which is **1234567890**
5. In the Custom Profile - Background choose **Video** option and select **Default Camera**:

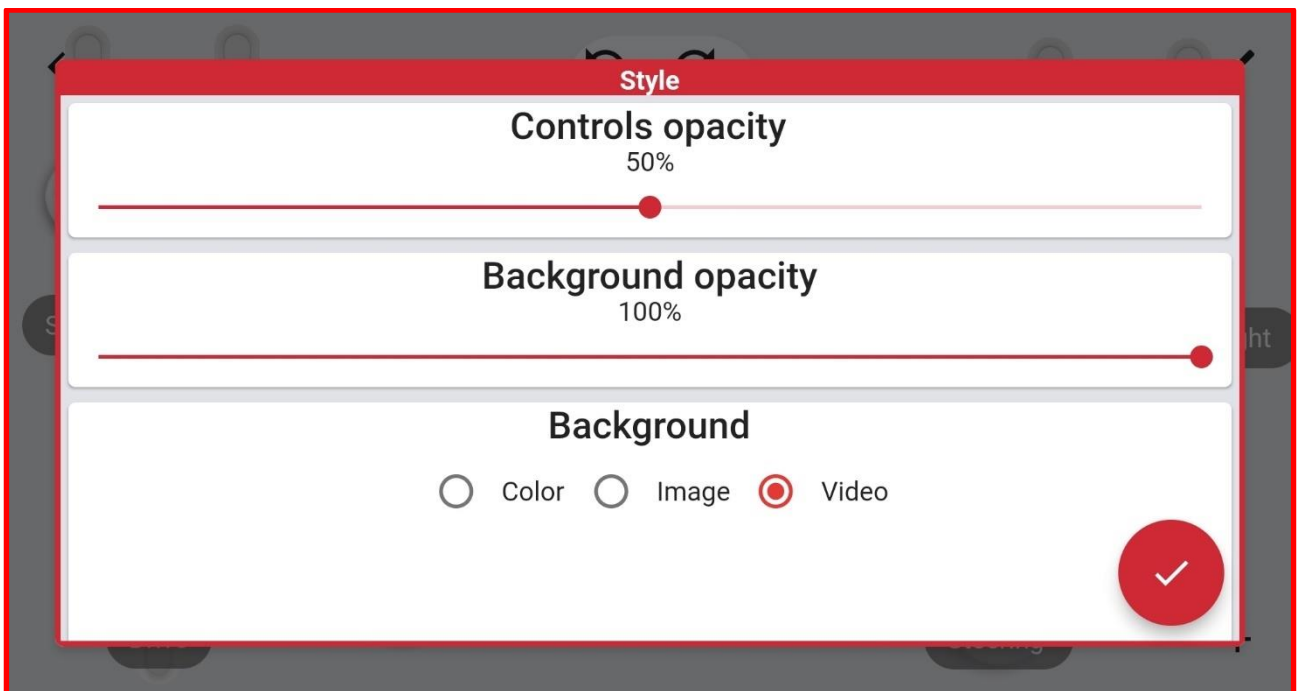

6. If you have some other camera, you can choose Custom URL and enter your camera's streaming URL here.

NOTE: you will need to get streaming URL information from camera vendor. We offer support for camera sold in BuWizz store only. We can not guarantee other cameras to work, even if they are visually similar.

7. For **better visibility** you can reduce **controls opacity**:

8. **Press start** and enjoy controlling your model via live stream.
